---

PERSONAL PROJECTS
1. Elian.ai: Developed a WhatsApp chatbot that provides detailed nutritional information about a dish based on an image of your food.
2. Dream Event: Created a digital invitation service for social events, along with offering surprise gifts.
3. b-bot: Designed a multifunctional business bot capable of handling sales, reservations, and providing information, among other functions.
4. Nucleus: Developed a template handler to promote rapid and standardized development of web projects.
5. Apiato: Created a tool that allows creating a CRUD REST API for SQL and NoSQL databases in a matter of minutes.
6. Apied-Piper: Developed a service that allows creating a CRUD microservice in one minute.

In addition to these projects, I have worked on many more that demonstrate my ability to innovate and create effective solutions.

RECOMMENDATIONS

Antonio Rodríguez
Habits.ai
"Erick is a person with great mystique and professional ethics. He also has extensive knowledge in different technologies and holding the position of CTO. I am very comfortable to have shared my work experience with him."

Yohan Beltrán
UAEH

"Erick is an extremely professional individual always willing to perform his work with high quality. Besides being an excellent team member, his motivation and freshness are an encouragement for others."

Sebastián Muñoz
Habits.ai "
Erick is an excellent professional with extensive technical knowledge. Working with him is very pleasant, and he will always be willing to lend a hand to take things to the next level."

Jesús Salvador Ángeles de la Cruz
SCT
"Erick was undoubtedly a great pillar at Habits. Not only for his knowledge and work, but also for his companionship and leadership. Always willing to help and give his best."

Claudia Pliego Vincent
Habits.ai
"Erick was an excellent coworker at Habits. Not only for his knowledge and work, but also for his companionship and leadership. Always willing to help and give his best."
